What is eFolder Backup Manager?

eFolder is an automated, secure, offsite data backup and restoration system providing powerful tools to protect important data.

Simple

- Fast, easy installation, under 30 minutes
- Backup unlimited data from anywhere
- Anytime access to saved files
- Flexible version control
- Only pay for storage space used

Safe

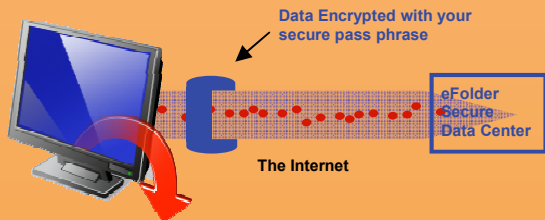

- Secure off-site storage
- No hardware to fail or maintain
- Automated process

Secure

- Data is fully encrypted
- User only access
- Changes only stored
- Data automatically copied to multiple secure sites
- Email notification of a missed or failed backup

What you DON'T get with eFolder

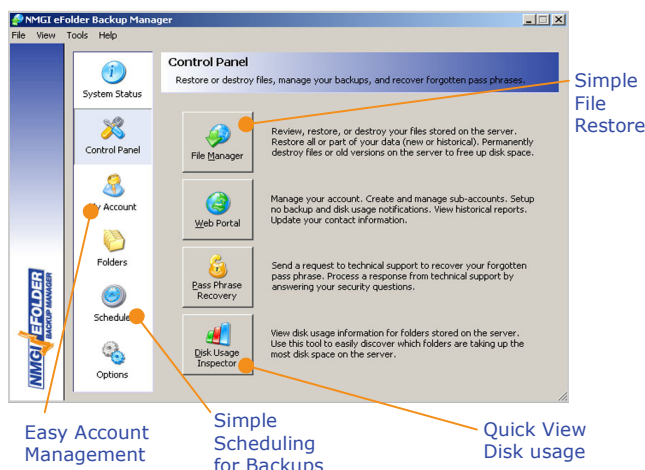

- Complicated backup procedures
- Media that can be lost, damaged, or fail
- Required transportation of backup media to a remote storage facility.
- Lost sleep wondering if your backup will really help you if you need it.

Backup

eFolder Backup Manager from Network Management Group, Inc. installs a small client software application on the local computer to manage all of the data protection and restoration. After the data you want to protect is defined, **eFolder Backup Manager** encrypts (256-bit Symmetric) and compresses the data and then transfers a copy to two different secure locations for storage.

There are different methods of file back up available, and while there may be a certain degree of risk involved in traditional methods such as tape storage, eFolder Backup Manager guarantees that even in the worst case scenario, files are safe and secure. eFolder will give you the peace of mind that you will always be able to recover your most important data.

Restoration

The **eFolder Backup Manager** has all the capabilities to restore valuable data when and where it is needed. Simply launch the **eFolder** Restore Wizard and follow the simple directions. Data is restored in minutes so you can get back to work with minimal interruptions.

Who Needs eFolder Backup Manager?

Everyone. Laptop users. Any sized business. Servers. Anywhere important information is stored. Studies have shown that the majority of PC users do not back up their critical data on a regular basis, but would be greatly inconvenienced if they ever lost their data.

Anyone looking for an easier and more reliable way to backup data needs **eFolder Backup Manager** from Network Management Group, Inc.
